# Planning Document for Check3 - Capstone Project

1. Schema - note that the many-to-many relationship table is contrived for the purposes of meeting a requirement. That table is not a natural requirement for the project.

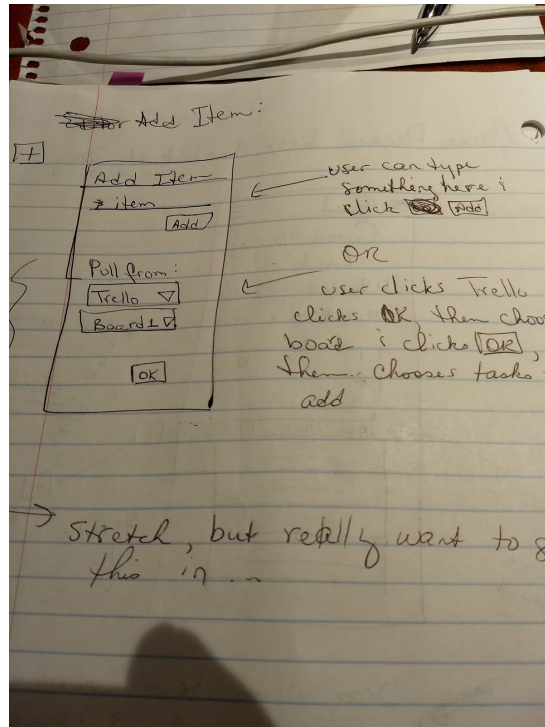

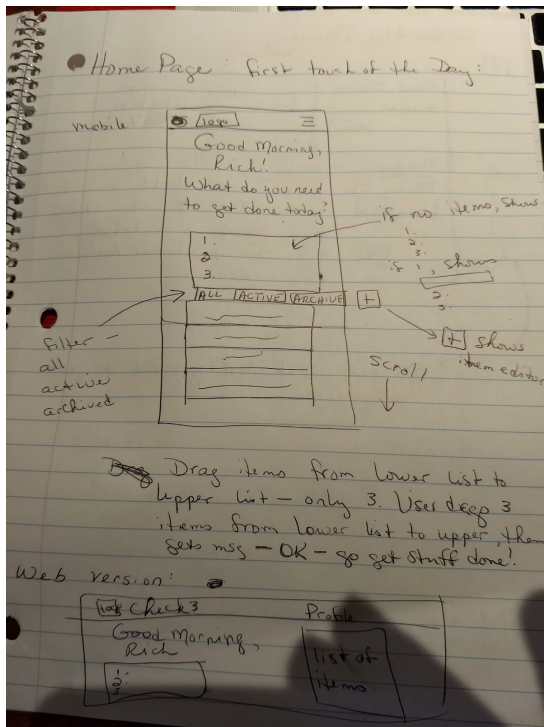

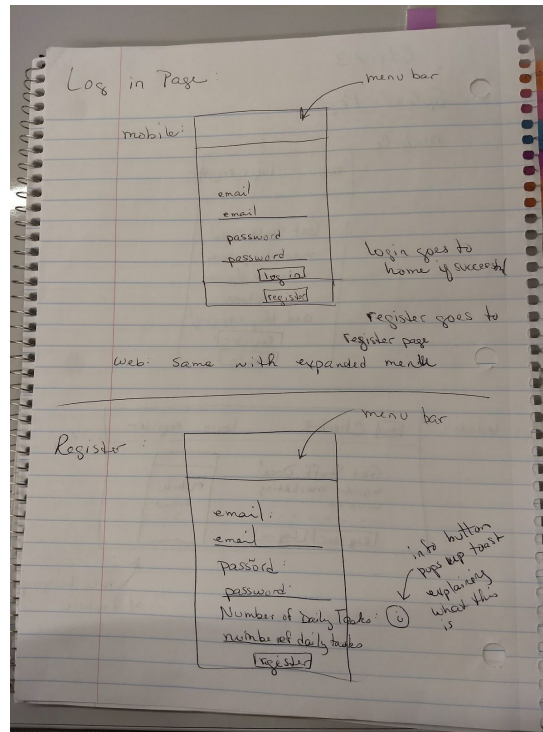

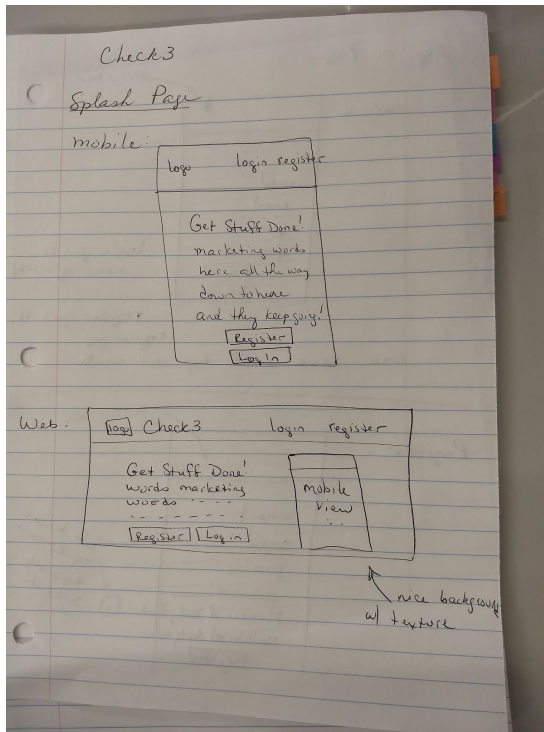

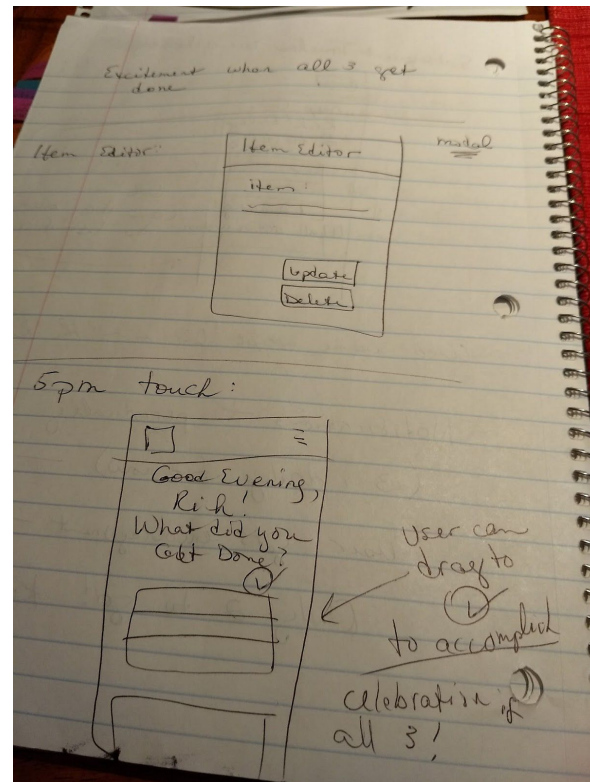

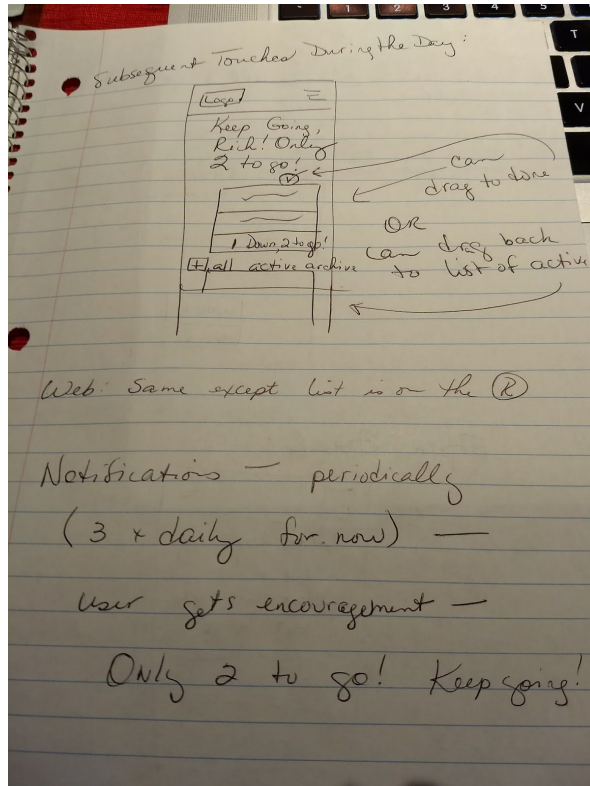

2. Server Routes

/users
/users/:id
/users/register
/users/login
/users/logout
/users/status
/users/getItems/:id

/items
/items/:id

/tips
